

Model AVCA — Open-End

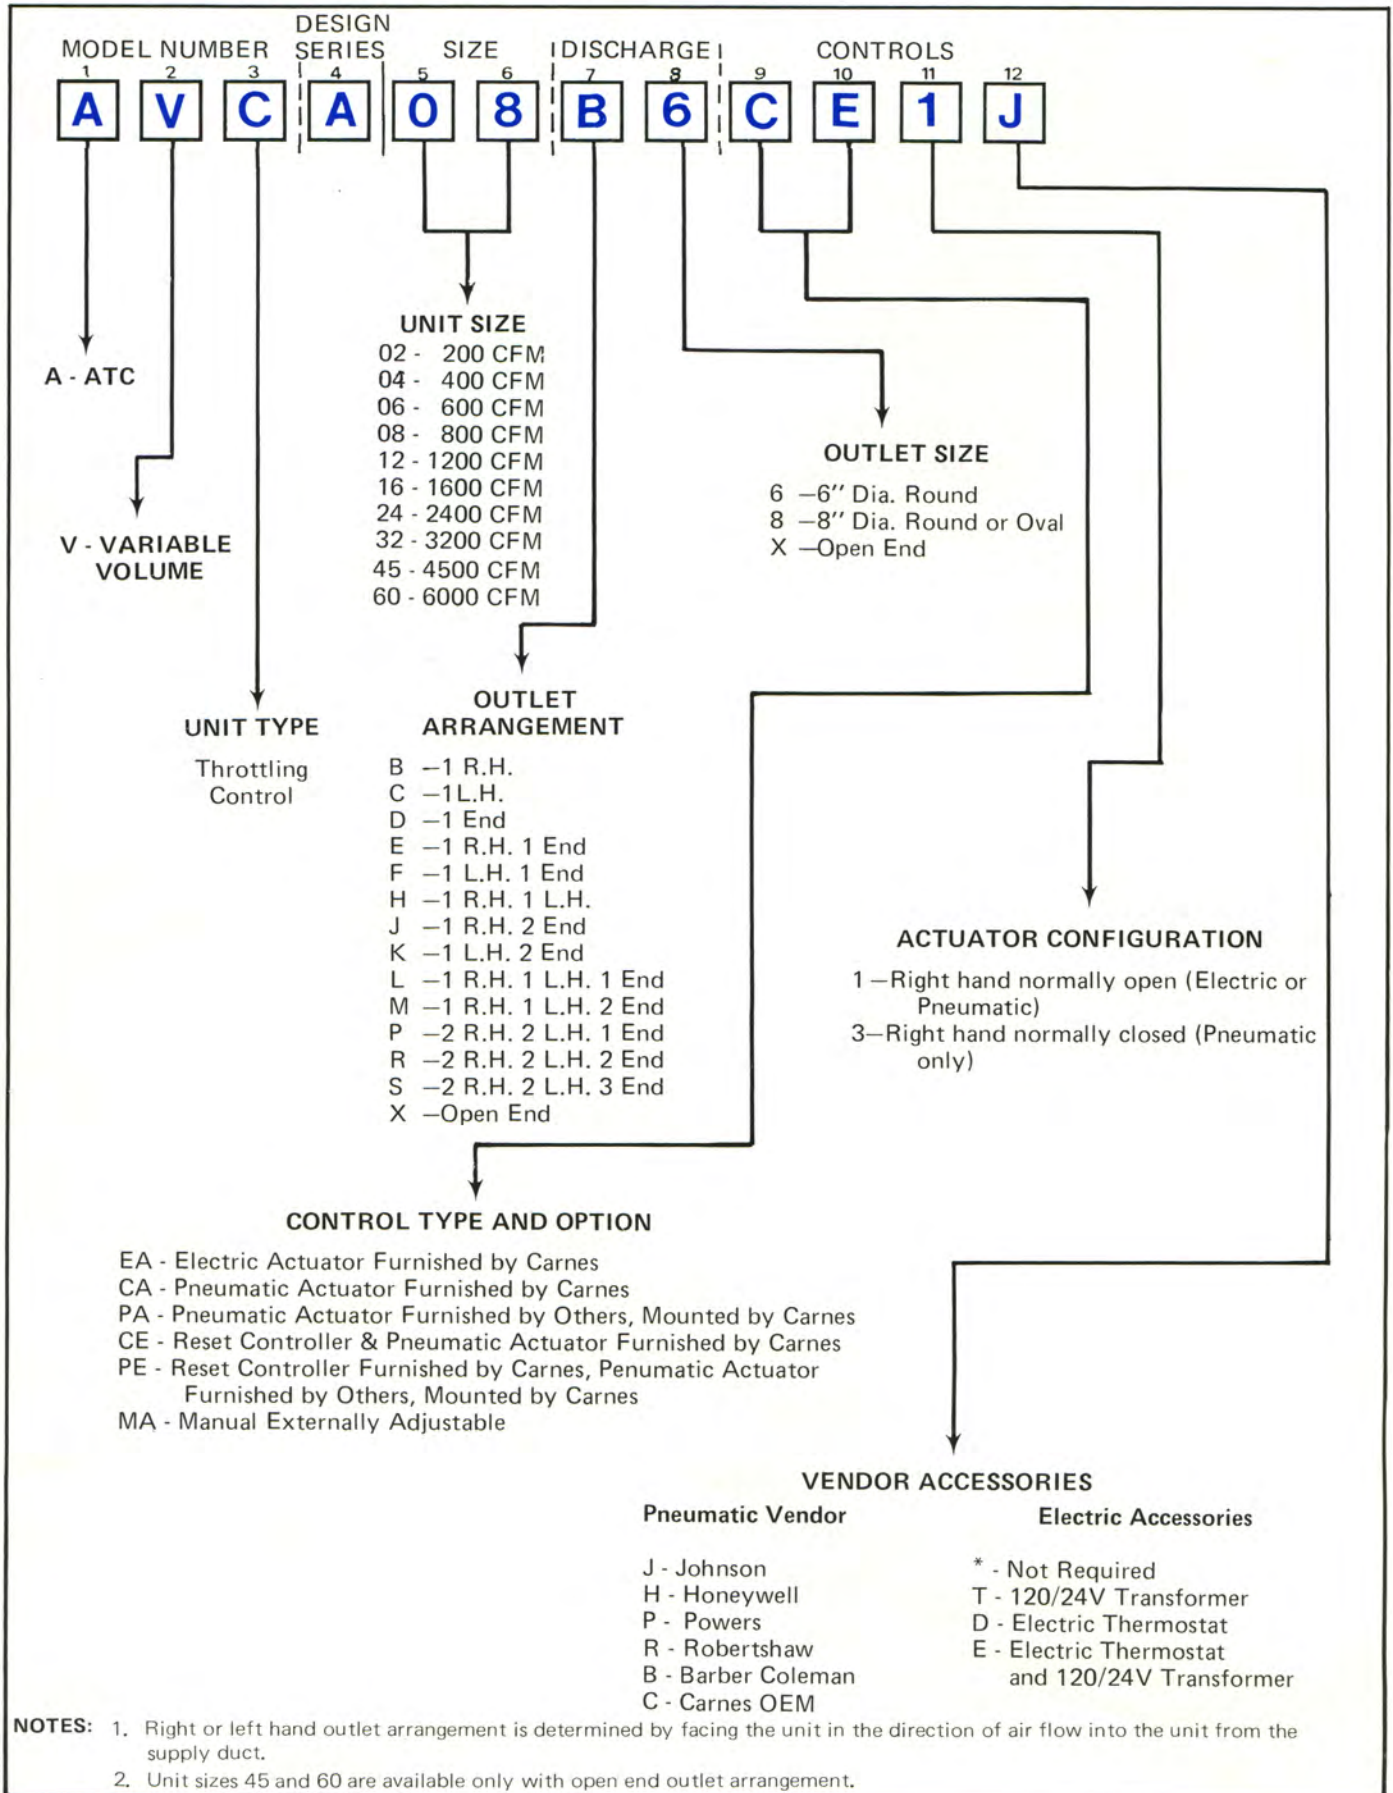

Model AVCA — Multi-Discharge

The Carnes Model AVCA, throttling control terminal unit, is available in open-end and multi-discharge configurations. By use of the patented throttling valve, these units offer low pressure drop, low sound levels, and linear valve characteristics which create stable control conditions within the conditioned space.

Other features include:

- Air flow capacities to 6000 CFM.
- Pneumatic, electric, or manual damper control.
- Thermally and acoustically insulated casing.
- Open-end discharge units are provided with S and drive connection for easy installation.
- Multi-discharge units have round or elliptical outlet connections with integral balancing dampers.
- Air flow sensor at inlet of unit.
- Hanger brackets for easy mounting characteristics.

Model Numbering System — AVCA EXTERNALLY POWERED
